Guidelines for Satellite TV Dishes

May 6, 2009

ARC Guideline

Over 100 DirectTV and other satellite TV dishes have already been installed in Eagle Lake East and Eagle Lake North. Although the CC&Rs require that a request and sketch be submitted before installing one, the ARC no longer sees a need for these individual requests.

The ARC stipulates that homeowners may have no more than two dishes, preferably located on the side or back of the house, and not installed on towers.
